

About Us

Consensus Energy is an environmental services company located in Atlanta, Georgia, that designs, installs, maintains, and finances retrofit and upgrade projects to improve the energy efficiency of buildings and facilities.

The City of Macon recognized Consensus Energy by awarding us the 2015 Environmental Award, presented to CE by Mayor Robert Reichart and GA House of Representatives Member, Nikki Randall.

Challenge

The City of Macon, a major metropolitan city in the state of Georgia, needed to upgrade the lighting in a City-owned garage, but did not have the budget to do so.

Solution

Consensus Energy agreed to install all new lighting at no cost to the city. The cost was recouped by sharing in the savings that the retrofit generated for a short period of time. After the shared savings period concluded, the City of Macon kept all the equipment and the savings.

Results

The project reduced the energy use of the garage by 70%. Over the shared savings period, the city put over \$30,000 back into the budget without having to spend any money.
